

Problem1

Yufei Yin

Question 1a, (3 points):

How many distinct years are present among the medals listed in the WinterO table in lab03.sqlite?

```
query = "SELECT DISTINCT year FROM WinterO"  
dbGetQuery(dbcon, query)
```

```
##      year  
## 1  1924  
## 2  1928  
## 3  1932  
## 4  1936  
## 5  1948  
## 6  1952  
## 7  1956  
## 8  1960  
## 9  1964  
## 10 1968  
## 11 1972  
## 12 1976  
## 13 1980  
## 14 1984  
## 15 1988  
## 16 1992  
## 17 1994  
## 18 1998  
## 19 2002  
## 20 2006  
## 21 2010
```

Question 1b, (3 points):

Provide code that can calculate the value you found in the previous section, making use of the DISTINCT SQL command.

```
query = "SELECT COUNT(DISTINCT year) FROM WinterO"  
dbGetQuery(dbcon, query)
```

```
##      COUNT(DISTINCT year)  
## 1                      21
```
